## International And Antique Flooring

Congoleum Industries, Inc. has recently introduced a new series of vinyl tile flooring with both international and antique motifs. Congoleum is also introducing a new series of do-it-yourself vinyl tiles that solve many of the classical problems with flooring of this sort.

## Controlled Flow Roof Drainage

"Flo-Set" is the name of a new line of roof drains featuring a method by which the drains can be precisely adjusted to the required flow control needed. In addition to the body and slotted dome, the drain provides vanes that form a watertight bond between the roofing material and drain. It has an adjustable collar and is marked with 18 weir settings to control discharge flow rates to a maximum of 420 G. M. P. Available in outlet sizes from 2" to 6". Josam Manufacturing Co.

## Foolproof Burglar and Fire Alarm

A wireless, plug-in-the-wall burglar and fire detection system is for home or office. Housed in a finished wood and metal cabinet are probes that totally saturate a given area with ultrasonic patterns which, when interrupted by an intruder (excessive heat or smoke), activate a 100-decible police warning horn. The Defensive Instruments system connects to floodlight and sprinkler systems for dealing with emergencies. It also connects to a device for phoning police, fire, or detective agencies.

## Special Windows Take Big Winds

PPG's Solarban Windows proved their worth during hurricane Camille's 200 mph winds. Solarban Windows are not only wind resistant but through the use of a reflective coating on one of the panes, provide an optimum thermal barrier, thereby lowering heating and cooling costs.
